

# Development of Human Resource Capacity for all-embracing stocktaking of urbanistic-architectural cultural heritage in Asia and Europe

within the scope of AsiaLink program of the European Union

## Intention for the implementation of the project

Cultural Heritage is in danger to get lost or disappear through globalization and economical developments as well as missing awareness about culture and history. This means a loss of national assets and identities.

## What's the content of the project?

- Definition of Culture Heritage, Terminology and Theoretical Background
- Stocktaking and Documentation, Analyses and assessment
- Redevelopment and Integration of Culture Heritage
- Scientific Management, Interaction in research, teaching and practise

## What's the Aim of the project?

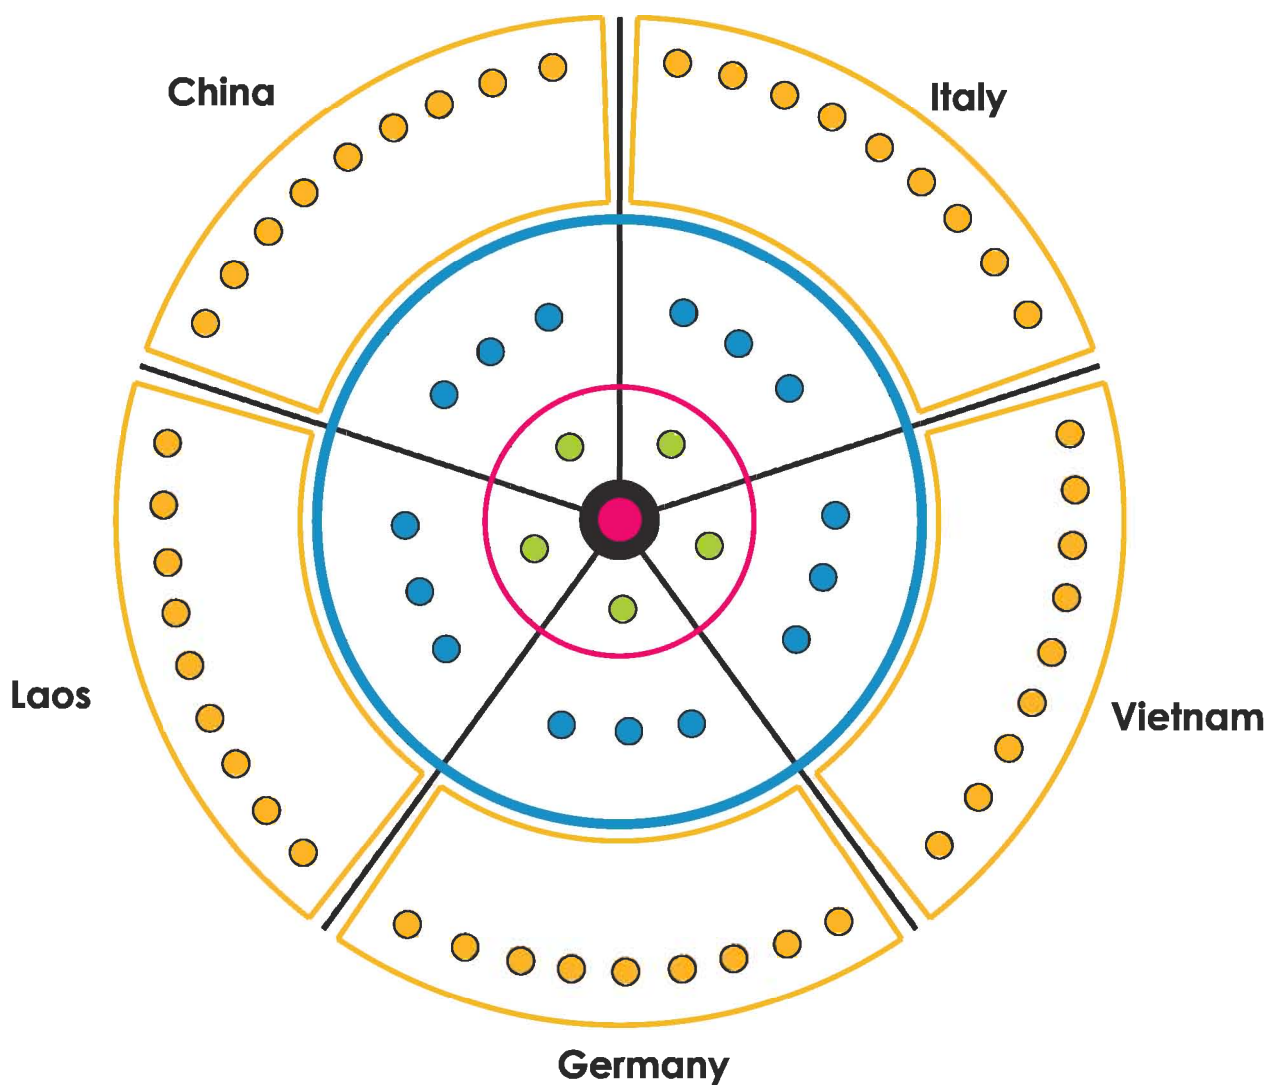

The aim is a new and better consciousness for cultural heritage and a higher responsibility of urban and architectural monuments.

The purpose of the project is the development of human resource capacity (scientists and university staff) to function in future as "multipliers" in addition with a platform for expert discussion about the stocktaking, documentation, conservation and redevelopment of urban architectural historical culture heritage.
